

Enrollment Total

At 2,795 Students

At the close of Tuesday's classes the enrollment figures for the University were totalled at 2,795 with 2,037 day students and 758 evening students, Hazel D. Geiner, registrar, announced. The total shows an increase of only five students as compared with last year's enrollment of 2,790.

This year's enrollment shows an increase in night classes and a decrease in day sessions. The biggest cause of this change is due to war industries employing more people, allowing students to attend the University only at night. There are 92 more evening students and 87 less day students. A slightly larger enrollment is expected over last year.
