

## Simulation Center

**Location:** Health and Science Campus

**Cost:** \$36 million

**Paid for by:** ProMedica and University of Toledo

**Completion Date:** Late 2013 or 2014.

**Details:** The goal for the Simulation Center is to help teach students through simulation models and simulated clinical settings. The programs will provide better training for new health professionals.

Students can expect to have more hands-on training in order to gain better skills in their field. The center is expected to positively impact patient care through simulation training. Funding is being shared between the university and ProMedica.
