What is Cross Blending?

an Art

might explain it this way...

Let's say your palting colors on the palette. But you know'd that you blend certain colors into the special hue you want.

This is very much what happens in making a good cigarette. And just as each color you use sets on the others to change and catch these, so each Chesterfield is made up of certain colors. That's why Chesterfield is what an artist calls a "Cross Blend."

That's why Chesterfield is a better kind. That's why Chesterfield is a better kind. That's why Chesterfield is a better kind.
