

September 28, 1926.

Mr. C. L. Carpenter,  
Honor,  
Michigan.

Dear friend:

In reference to your letter of the 17th in which you request information about pike to be planted in Michigan, wish to advise that I have taken this matter up with the State people here and the State of Ohio does not propagate pike, neither grass nor northern, and they advise me to instruct you to get in touch with the Riley Fish Farm, Akron, Ohio, and that they would take care of you in this matter.

If I knew anyone in Akron, I would take the matter up myself. Please advise me what information you get and I will also keep in touch with the matter and see if I can help you.

I will try to arrange to be up there some time in October and pay you a visit and will then bring up the little token I promised you.

Yours very truly,

HJ/S
