October 27, 1965

FOR RELEASE UPON RECEIPT

The University of Toledo Department of Chemical Engineering has received a \$1,000 unrestricted departmental assistance grant from the Gulf Oil Corp.

The grant is one of 70 that Gulf is distributing this year to selected departments in as many colleges and universities under the company's aid to education program. In all, some \$2 million will be distributed under Gulf programs during 1965 to students and institutions of higher education for scholarships and other education purposes.

The check was presented to Dr. William S. Carlson, president of the University of Toledo, by T. G. Cain, manager-industrial relations at Gulf's Toledo refinery.
