**Double Appropriation Urged
For Toledo Medical College**

**Rep. Valiquette Asks Another \$7.5 Million
For Teaching Hospital At New School**

Blade Columbus Bureau

COLUMBUS, July 1—A Toledo representative urged today that the Legislature double the \$7.5 million appropriation for the Toledo State Medical College to provide funds for a teaching hospital at the school.

Rep. Marigene Valiquette, a Democrat, made the proposal at a meeting of the House Finance Committee. The present \$7.5 million appropriation is earmarked for a basic clinical science facility at the school.

Sen. Tennyson Guyer (R., Findlay) introduced a bill yesterday that would permit the medical college to share proceeds of a proposed Lucas County bond issue. Such a bond issue is being considered by Lucas County commissioners, and Senator Guyer said his bill would remove doubts about the legality of the medical school receiving funds from the sale of the bonds.

Legislative approval is needed by July 14, deadline for the bond issue to be certified by the county auditor, Senator Guyer said.

Dr. John Millett, chancellor for the board of regents, replying to Miss Valiquette, said that unquestionably further funds for the medical

school are going to be needed, but cannot be appropriated until the college trustees hire a dean, arrange affiliations with existing hospitals, and make plans for the teaching hospital.

Besides, he added, all the higher education money from the two general state bond issues has been earmarked, so any increased medical school appropriation would have to be taken away from some other project.

"The \$7.5 million is just a start—we recognize it is only a start—but we can't go further until plans are completed. It takes a long time to get a medical school started," he said.

Rep. Robert Reckman (R., Cincinnati) asked Miss Valiquette which projects should be cut to get the additional funds.

"We have all weekend to think about that," she replied.

The committee took no action on her request.
