

Medical College Board Speeds Plans For \$25 Million Campus Buildings

3 Architectural Firms Designated For Negotiations

Completion of detailed plans for about \$25 million in new buildings, which would virtually finish the first major portion of the permanent South Toledo campus, was authorized Monday by trustees of the Medical College of Ohio.

The board accelerated planning of the permanent campus just three days before the college welcomes its first class in temporary facilities based primarily at William Roche Memorial Hospital and Maumee Valley Hospital.

Negotiations Authorized

Dr. Glidden Brooks, president, was authorized to negotiate with Don Hisaki & Associates, Cleveland architectural firm, for final plans on a \$3.8 million library-learning center; with Minoru Yamasaki & Associates, Troy, Mich., for plans on \$13.9 million in clinical science facilities, of-

fices, and research laboratories, and with Richards, Bauer & Moorhead, Toledo, on an auditorium, audio-visual center, computer center, and animal storage and maintenance-service facilities to cost about \$8.5 million.

The three architectural firms had been selected for the projects earlier and have completed preliminary planning which met with board approval.

State funds already have been authorized for the planning, and the trustees were told that applications for federal funds for construction of two of the projects—the library-learning center and the auditorium-support facilities—are due by Oct. 30. If federal and state funds are approved, the board was told that construction could be under way by 1971.

U.S. Grant Sought

The board action came as a committee from the U.S. Public Health Service's bureau of health professions, education, and manpower was in Toledo to consider the college's application for \$7 million in federal construction funds on the first permanent facility, a major health-science laboratory building. Plans for this building were completed this summer.

The committee, made up of representatives of the Government and medical educators, will recommend approval or dis-

The state has set aside \$3.5 million for the health-science structure and college officials hope that the first facility can be under construction next year.

First Class Slated For Orientation

Dr. Brooks told the trustees that the first 32-member class will arrive on campus Thursday for orientation. Classes are to begin Monday.

The college will be dedicated by Governor Rhodes in a special ceremony Sept. 21 at 2:30 p.m. The public will be welcome at the dedication.

Trustees were told that the college already has received 300 applications for admission next year, and that requests have been received for 1,200 more. Applications received during the first year totaled 375.

21 More Doctors Named Part-Time Faculty Members

Twenty-one more Toledo area doctors were named by the board to one-year positions as part-time faculty members, and the appointments of 26 others were renewed for another year. The doctors volunteer their services without compensation.

Drs. Robert P. Sheon, Jerome Kimmelman, Thomas D. Geraciotti, and Richard L. Schafer were named clinical associates in the department of medicine.

Named clinical associates in orthopedics were Drs. Thomas H. Brown, Jr., Robert F. Cooke, Joseph Gosman, Ned B. Hein, David Leonard Louis, Jack W. Millis, Howard Rosenblatt, and Gerald Sutherland.

Six area doctors named clinical associates in plastic surgery are George J. Baibak, Robert K. Dean, James G. Diller, John C. Kelleher, Henry McWhorter, and James G. Sullivan. Dr. Richard T. Torchia was named clinical associate in ophthalmology and Dr. George Bates in surgery.

The first clinical associates whose appointments were extended were Drs. Richard F. Baer, Don C. Nouse, Herman W. Reas, and C. Robert Tittle, Jr., in medicine; Drs. Herbert L. Baker, Jankiel Barg, Simon Dorfman, and Henry L. Hartman in psychiatry; Drs. William D. Hann, Harold H. Lee, Charles A. Leone, and Wanda L. Springer in microbiology.

Also, Drs. Robert L. Hauman, Charles H. Klippel, Ward Carl Meyers, Spencer W. Northrup, Morris W. Selman, Donald Steinberg, Ernst Sternfeld, and Robert B. Strother in surgery; Drs. Edward L. Burns and Daniel J. Hanson in pathology; Dr. Jack Hutchinson in rehabilitation medicine; Dr. Maimon Nasatir in physiology; Dr. Marian M. Rejent in pediatrics, and Dr. James Scala in anatomy.

TU Physics Chairman Appointed To Faculty

Dr. John J. Turin, chairman of the physics department at the University of Toledo, was appointed an adjunct professor of physics. He will retain his TU position and will volunteer his services to the medical college.

The board also approved a number of full-time faculty appointments:

Dr. Ben Pansky, 41, former associate professor of anatomy, histology, and neuroanatomy at New York Medical College, was named a full-time professor in the department of anatomy. Dr. Pansky's hobby is writing children's books.

Dr. Dickson D. Despommier, 29, who has been a post-doctoral fellow at Rockefeller University, New York City, was named assistant professor of microbiology.

Dr. Iqbal Singh, 43, a native of India who has been an assistant clinical professor of orthopedic surgery at the California College of Medicine-Los Angeles and University of California-Irvine, was named assistant professor of orthopedics.

Board Votes To Increase Brooks' Salary To \$40,000

Dr. Brooks' salary was increased by the board from \$35,000 to \$40,000, his first raise since he was named to head the college in 1966. Approval of the salary increase was preceded by comments from trustees that Dr. Brooks is to be commended for gathering an outstanding faculty, inspiring a progressive curriculum, and eliciting an unusual degree of cooperation from community health agencies and institutions.

Trustees also established a student financial aid program to arrange grants-in-aid and loans to worthy students.
